

## 2023 Environmental Policy, Goal and Project

	Policy	2023 Goal	Project
E	Setting Goals for Reducing Greenhouse Gas Emissions	Establishment of a working group for greenhouse gas emission reduction	<ul style="list-style-type: none"> <li>Explore New Technology for GHG Reduction</li> <li>Engage in GHG Reduction Society</li> <li>Green Supply Chain and Supplier Collaboration</li> <li>Electric Trucks, Wheel Loaders and Cars</li> </ul>
	Energy Management	Renewable electricity of 5 MW	<ul style="list-style-type: none"> <li>Solar Farm และ Solar Rooftop</li> </ul>
	Efficient Water Use Management & Reduction of Water Usage	Recycle 25% of wastewater (Thailand)	<ul style="list-style-type: none"> <li>Zero Wastewater</li> </ul>
	Waste Management, Promoting Recycling & Reuse	<ul style="list-style-type: none"> <li>Waste to landfill reduced by 15% (Thailand)</li> <li>Disposal of hazardous waste (Bag Filter) decreased by 10% of the total weight (Thailand)</li> </ul>	<ul style="list-style-type: none"> <li>Zero Waste to Landfill</li> </ul>
	Commitment to Protecting & Restoring Natural Habitats and Ecosystems	Plant 1,500 carbon-offset trees and support 3 communities in sustainable natural resource management	<ul style="list-style-type: none"> <li>Forest Planting</li> </ul>
	Designing Products with Environmental Considerations from Production to Disposal or Recycling	Explore the technology for decarbonization products	<ul style="list-style-type: none"> <li>Decarbonization Products</li> </ul>
